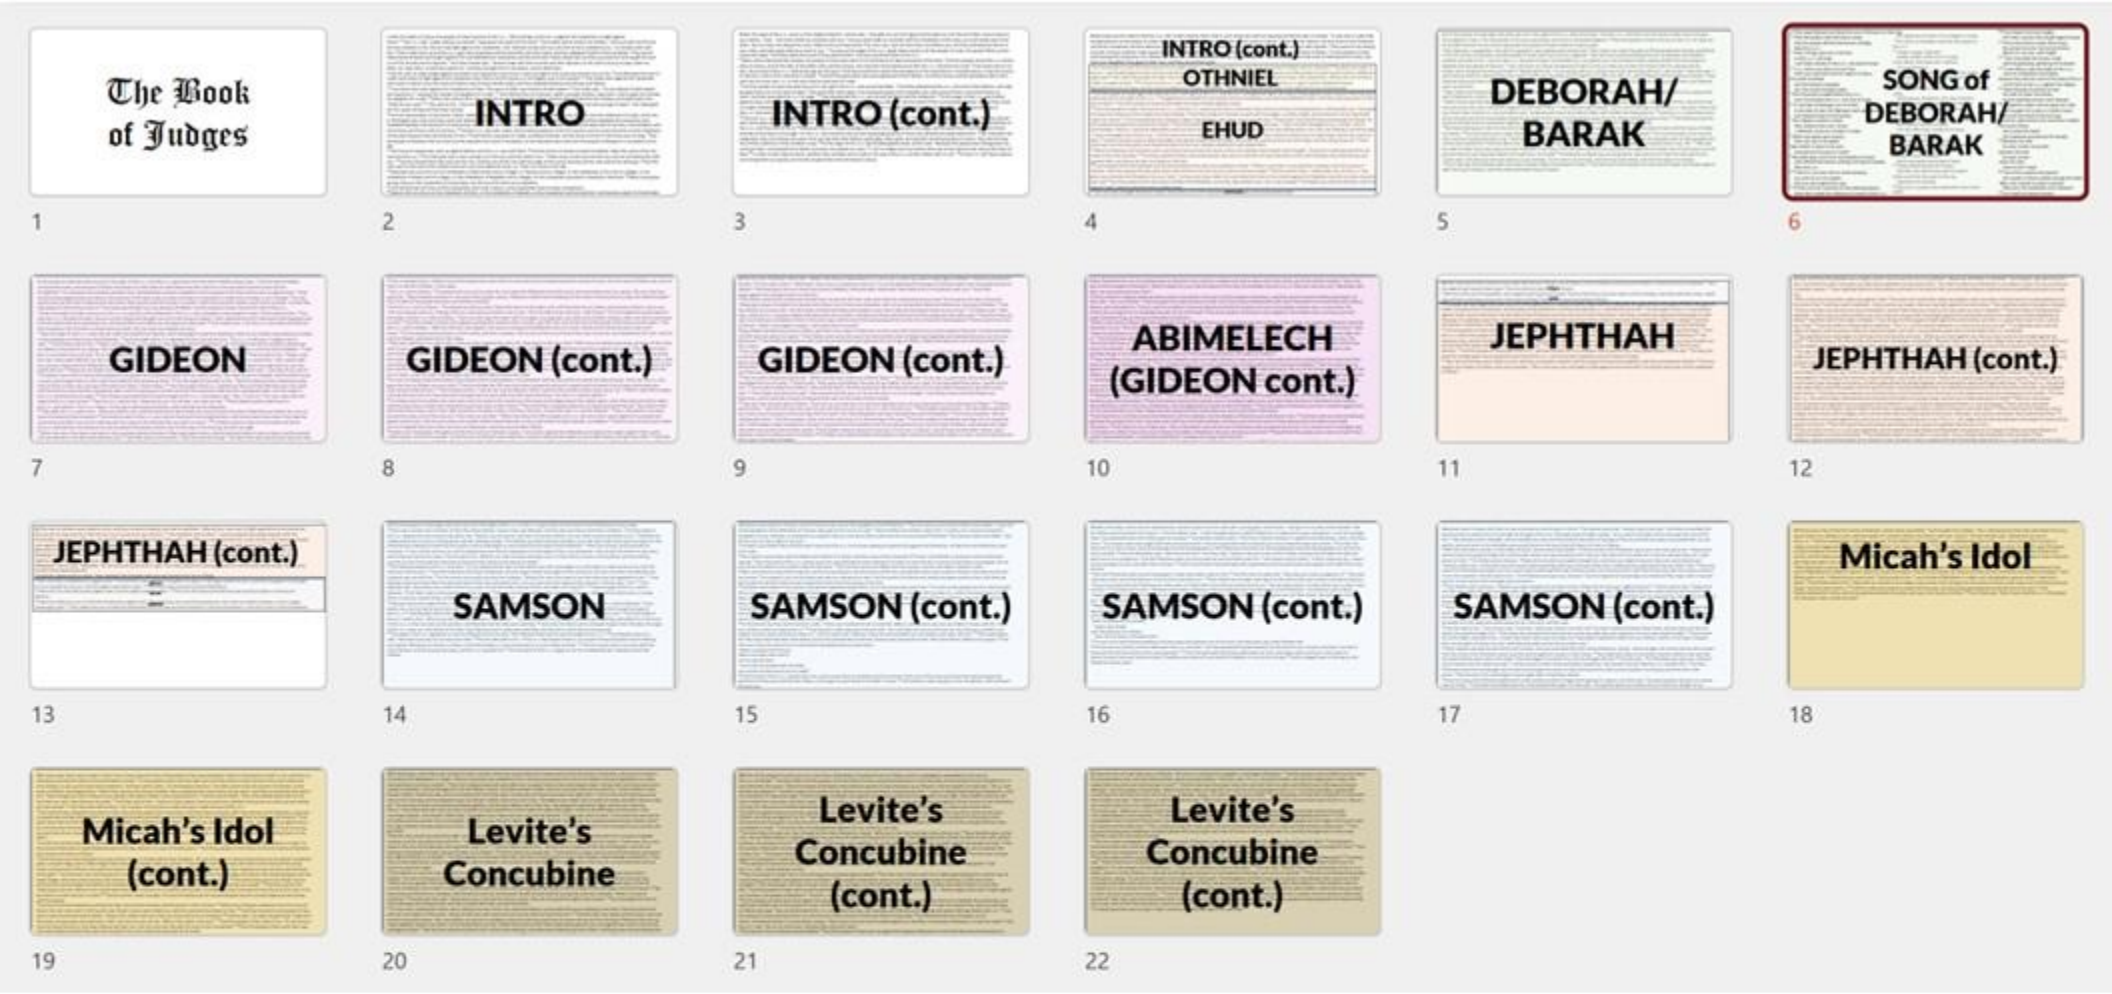
HOW TO MAKE AN OVERVIEW OF A BOOK



Filter out the verses from the chapters. Add 1 chapter per slide.
(Note: some chapters may extend off the slide, but that's ok because you can still read it, and you are not using this as a presentation to project.)
Change the background color of the slide (or a section within the slide) to represent similar events happening. Use a darker version of the same color to represent a connected, but different event. (Example: Abimelech is the continuation of Gideon.)
Add a title in large letters to see at a glance what is happening.
Go to the "grid" view and decrease the size until you can see all the slides together.
